

Activity Sheet 2 for “The Snickerdoodle Mystery”

PILINUT PRESS, INC.

Name: _____

How many cookies did the dog eat? The author does not say, but he does give you clues! Let's figure it out.

1. Each time Patricia makes a batch of cookies, they disappear. How many cookies are in a “batch”? (Hint: Find the recipe in the book.) Write down how many cookies are in each batch.

_____dozen

2. The recipe gives the number of cookies by saying how many “dozen” cookies the recipe will make. How many cookies make a “dozen”?

_____cookies

3. Multiply the number of dozens (answer to question 1) by how many cookies make up a dozen (answer to question 2) to find out how many cookies are made in each batch.

_____ X _____ = _____cookies

4. Count the number of times a batch of cookies disappear in the story. Write it down.

_____batches

5. Multiply the number of cookies in a batch (answer to question 3) by the number of batches of cookies (answer to question 4) which disappear to find out how many cookies the dog ate!

_____ X _____ = _____cookies

That's a lot of cookies!!
