

## **Index**

To clarify entries where different people had the same name there are notations to indicate which person is referenced. Sometimes a birth year is given. In other instances a relationship is cited. The list includes names of family members, historical figures, experts in areas of interest, and community members who shaped our family's history. Women are indexed by their maiden surnames. Some women who would have been known or mentioned among the family only by a married name have a reference index entry directing readers to the maiden surname listing. There are a couple of males who changed their surnames and a similar procedure has been followed.
